Research experiences

Dec. 2022 - Now

June 2022 - Nov. 2022

Feb. 2022 - June 2022

PhD student at University of Campania "Luigi Vanvitelli" in collaboration with **INAF - Osservatorio Astronomico d'Abruzzo** studying the dynamical evolution and multiple-populations in Globular Clusters. Supervisors: Prof. Oscar Straniero and Prof. Lucio Gialanella.

Studentship at INAF - IAPS entitled "Activity of study and formation of planetary structures, through modelling and/or remote sensing and/or laboratory data" concerning the projects "ExoMars", "Dawn" and "TRIS". Study of the numerical methods of Smoothed Particle Hydrodynamics for the simulation of hydrodynamic phenomena of interest for the mentioned projects.

Internship at INAF - Astronomical Observatory of Rome, finalized at learning the mathematical techniques of the "Information Field Theory" and their application to astronomical data, with reference to the high-contrast images produced within the SHARK-VIS project, an instrument intended for the LBT telescope for deep detection of exoplanets through direct images.

Research Interests

Stellar dynamics, collisional systems, Globular Clusters, stellar systems and populations, gravothermal catastrophe, formation, evolution and stability of self gravitating systems. I am also interested in volatiles emission from planetary surfaces, numerical methods and simulations, gravity theories, stellar formation and evolution, dark matter, planetary sciences and data analysis.

Education

16th Nov. 2021

1st Oct. 2019

Master degree in Astronomy & Astrophysics, University of Rome "La Sapienza", *cum laude*. Thesis title: Gravothermal catastrophe in models of Globular Clusters with a mass distribution. Supervisor: Prof. Marco Merafina.

Bachelor's degree in Physics, University of Rome "La Sapienza". Dissertation title: Carbon ignition curves for massive stars. Supervisor: Prof. Oscar Straniero

Publications

2022

Merafina M. and **Teodori M.**, "Generalization of the Fokker-Planck equation for stellar orbit diffusion in multi-mass star systems" [arXiv: 2205.10209]

Collaborations

Active

	<ul style="list-style-type: none"> – Participation to scientific meetings of the research group lead by Prof. Marco Merafina at University of Rome "La Sapienza", concerning a research project entitled "Stellar evolution and dynamical evolution in Globular Clusters: theoretic development and N-body simulations". – Collaboration with INAF-IAPS for the study of volatiles emission from planetary surface and fractures using a Smoothed Particle Hydrodynamics (SPH) approach. Member of the International Space Science Institute (ISSI) group led by Dr. Michelangelo Formisano, for the project "Thermophysical characterization of ice-rich areas on the surface of specific planetary bodies: conditions for the formation of a transient exosphere", active in the development of SPH codes able to collaborate with Eulerian codes.
Past	
	<ul style="list-style-type: none"> – Collaboration with INAF-OAR for the development of codes for High Contrast Imaging for the SHARK-VIS project, finalized at the direct detection of extra-solar planets.
Talks	
19-21 Mar. 2024	M. Teodori , G. Magni, M. Formisano and L. Maggioni, " <i>Advancements in SPH modeling for volatiles emission</i> ", ISSI International Team Meeting, Bern, Switzerland.
16-20 Oct. 2023	M. Teodori , O. Straniero, M. Merafina and L. Gialanella, " <i>Dynamical evolution of Multiple Populations in Globular Clusters</i> ", STARS Across the Universe. INAF - Osservatorio Astronomico di Capodimonte, Napoli, Italy.
6-10 Feb. 2023	M. Teodori , G. Magni, M. Formisano, M. C. De Sanctis and F. Altieri, " <i>Volatiles emission from a fracture on a planetary surface: a Smoothed-Particle-Hydrodynamics approach</i> ", XVIII Congresso Nazionale di Scienze Planetarie, Perugia, Italy.
14th Nov. 2022	M. Teodori , " <i>Multi-mass collisional stellar systems models for Globular Clusters</i> ", G11 Workshop, Physics Department, University of Rome "La Sapienza".
Posters	
8-12 May 2023	M. Teodori , G. Magni, M. Formisano, M. C. De Sanctis and F. Altieri, " <i>Volatiles emission from a cavity on a planetary surface using smoothed particle hydrodynamics</i> ", Biennial European Astrobiology Conference BEACON 2023, La Palma & Teneguia Princess Hotel on Fuencaliente, La Palma Island, Canary Islands, Spain.
Seminars	
16th Feb. 2023	M. Teodori , " <i>The interconnection between multi-mass dynamical models and multiple populations in Globular Clusters</i> ", INAF-OOAb colloquia.
PhD schools	
2-6 October 2023	INAF - Scientific Communication in Astronomy School, Bertinoro, Italy.
Coding/software experience	
Programming languages	C intermediate level (4 yrs, Bachelor's degree thesis and courses, PhD project), Fortran intermediate level (2 yrs, Master thesis, PhD project), MATLAB (for programming) basic level (PhD course) and Python intermediate level (2 yrs, INAF experiences and PhD project).
Professional skills	Basic experience (1 yr) with parallel codes: PySPH for hydrodynamical simulations, MCLUSTER and NBODY6++/NBODY6++GPU respectively for setting initial conditions and run N-body simulations of Globular Clusters.
Data analysis and visualization	Experience with MATLAB (6 yrs) and Python (2 yrs) acquired during university courses, thesis work, INAF experiences and PhD project.
Document drafting	Experience of 6 yrs with L^AT_EX , in particular for scientific reports and papers drafting.

Remote control	Basic knowledge (2 yrs) of remote connection to servers for running numerical simulation using SSH and SFTP protocols or by using a remote desktop software like AnyDesk, Splashtop and TeamViewer.
Others	Intermediate experience in Office automation packages, in particular with software for presentation, document elaboration and spreadsheets, refined from Italian secondary school to today (around 12 yrs experience). Basic ability in managing videoconferencing.
Teaching experiences	
Tutoring	Occasional and sometimes regular tutoring of high school students in Math and Physics.
Others	Helping out with master degree thesis work of prof. Merafina students.
